KEY BENEFITS:

Hey–weight Multiple Use Counterbalance Block

A heavy-duty, self-weighted block weighing 20kg, designed for multiple applications without the need for secondary filling with water or concrete.

The block eliminates the need for traditional sandbags as counterbalance weights, providing a convenient, robust and reliable solution for temporary fencing and site safety applications.

KEY FEATURES:

- 20kg self-weighted block.
- No additional water or concrete filling required.
- Eliminates the need for sandbag counterweights.
- Suitable as a heavy-duty fencing foot.
- Can be used as a counterbalance weight for temporary fencing.
- Compatible with GS6 goalpost systems.

A simple, robust and reusable alternative to traditional sandbag weighting systems.
